

BUREAU OF NONPOINT POLLUTION CONTROL
DIVISION OF WATER QUALITY
NJ DEPARTMENT OF ENVIRONMENTAL PROTECTION

INDUSTRIAL STORMWATER PERMITTING PROGRAM REGULATED DISCHARGES AND REGULATED FACILITIES

WHAT INDUSTRIAL STORMWATER DISCHARGES TO SURFACE OR GROUND WATER ARE REGULATED?

Unless all of your industrial facility's stormwater is discharged to a combined sewer (one that carries sanitary waste water and stormwater to a municipal treatment plant) or all the stormwater discharges to a municipal treatment plant), you must apply for or have a NJPDES permit for stormwater discharge (either an industrial general stormwater permit, or an industrial individual stormwater permit, as appropriate). Stormwater includes stormwater runoff, snow melt runoff, and surface runoff and drainage. Wash waters and non-contact cooling waters are not stormwater.

Industrial stormwater discharge to surface or ground water means the discharge of stormwater from areas of the site related to manufacturing, processing or raw materials storage. For the categories of industries identified in (i) through (x), the term includes, but is not limited to, stormwater discharges from industrial plant yards; material handling sites; refuse sites; sites used for the storage and maintenance of material handling equipment; sites used for residual treatment, storage, or disposal; shipping and receiving areas; manufacturing buildings; storage (including tank farms) for raw materials, and intermediate and finished products; and areas where industrial activity has taken place in the past and significant materials remain and are exposed to stormwater. For the categories of industries identified in (xi), the term includes only stormwater discharges from all the areas that are listed above,

where material handling equipment or activities, raw materials, intermediate products, final products, waste materials, by-products, or industrial machinery are exposed to stormwater.

For the purposes of this definition, material handling activities include: storage, loading and unloading, transportation, or conveyance of any raw material, intermediate product, finished product, by-product or waste product. The term excludes areas located on plant lands separate from the plant's industrial activities, such as office buildings and accompanying parking lots as long as drainage from the excluded areas is not mixed with the stormwater drained from the above described areas.

In addition, this definition includes any discharge of stormwater to surface or ground water that the Department: 1. Classifies as industrial stormwater discharge to surface or ground water at the request of the permittee, applicant or the prospective applicant; or, 2. Declares to be a significant contributor of pollutants to surface or ground water of the State.

WHAT FACILITIES ARE REGULATED?

The following categories of facilities are considered to be engaging in industrial activity for the purposes of the New Jersey Pollutant Discharge Elimination System (NJPDES) permit application regulations for stormwater discharges:

(i) Facilities subject to stormwater effluent limitation guidelines, new source performance standards, or toxic pollutant effluent standards under 40 CFR Sub-

chapter N (except facilities with toxic pollutant effluent standards which are exempted under category (xi) below).

(ii) Facilities classified with the following Standard Industrial Classification (SIC) codes:

- | | |
|------|---|
| 24 | Lumber and wood products (except 2434: wood kitchen cabinets) |
| 26 | Paper and allied products (except 265 and 267: paper board containers and boxes and miscellaneous converted paper products) |
| 28 | Chemicals and allied products (except 283: drugs, and 285: paints and allied products) |
| 29 | Petroleum and coal products |
| 311 | Leather tanning and finishing |
| 32 | Stone, clay and glass (except 323: products of purchased glass) |
| 33 | Primary metal industries |
| 3441 | Fabricated structural metal |
| 373 | Ship and boat building and repairing |

(iii) Facilities classified with the following SIC codes, including active or inactive mining operations, and oil and gas exploration, production, processing or treatment operations, or transmission facilities that discharge stormwater contaminated by contact with or that has come into contact with any overburden, raw material, intermediate products, finished products, by-products or waste products located on the site of such operations:

- | | |
|----|--|
| 10 | Metal mining, active or inactive mining operations |
| 12 | Coal mining |
| 13 | Oil and gas extraction, |

	production, processing, or treatment operations, or transmission facility	45	Air Transportation	267	Miscellaneous converted paper products
14	Nonmetallic minerals, except fuels	5171	Petroleum bulk stations and terminals	27	Printing and publishing
	(iv) Hazardous waste treatment, storage, or disposal facilities, including those that are operating under interim status or a permit under Subtitle C of RCRA;		(ix) Treatment works treating domestic sewage or any other sewage sludge or wastewater treatment device or system, used in the storage, treatment, recycling, and reclamation of municipal or domestic sewage, including land dedicated to the disposal of sewage sludge that are located within the confines of the facility, with a design flow of 1.0 mgd or more, or required to have an approved pretreatment program under 40 CFR Part 403. Not included are farm lands, domestic gardens or lands used for sludge management where sludge is beneficially reused and which are not physically located in the confines of the facility, or areas that are in compliance with Section 405 of the Federal Clean Water Act.	283	Drugs
	(v) Landfills, land application sites, and open dumps that receive or have received any industrial wastes (waste that is received from any facilities described under this subsection) including those that are subject to regulation under Subtitle D of RCRA;			285	Paints and allied products
	(vi) Facilities involved in the recycling of materials, including metal scrap yards, battery reclaimers, salvage yards, and automobile junkyards, limited to those classified with the following SIC codes:			30	Rubber and miscellaneous plastic products
5015	Motor vehicle parts, used			31	Leather and leather products (except 311: Leather tanning and finishing)
5093	Scrap and waste materials			323	Products of purchased glass
(vii)	Steam electric power generating facilities, including coal handling sites;			34	Fabricated metal products (except 3441: fabricated structural metal)
	(viii) Transportation facilities classified with the following SIC codes which have vehicle maintenance shops, equipment cleaning operations, or airport deicing operations. Only those portions of the facility that are either involved in vehicle maintenance (including vehicle rehabilitation, mechanical repairs, painting, fueling, and lubrication), equipment cleaning operations, airport deicing operations, or which are otherwise identified under (i) through (vii) or (ix) through (xi) are associated with industrial activity:			35	Industrial machinery and equipment
			(x) Construction activity including clearing, grading and excavation activities except those that result in the disturbance of less than five acres of total land area which are not part of a larger common plan of development or sale. Construction activity associated with landfills is regulated if "significant material" is exposed, or if the landfill still receives industrial solid waste. (This applies assuming that the landfill is not exempt for other reasons.)	36	Electronic and other electric equipment
				37	Transportation equipment (except 373: ship/ boat building and repair)
				38	Instruments and related products
				39	Miscellaneous manufacturing industries
				4221	Farm product warehousing and storage
				4222	Refrigerated warehousing and storage
				4225	General warehousing and storage
40	Railroad transportation				
41	Local and interurban passenger transit	20	Food and kindred products		
42	Trucking and warehousing (except 4221-25: farm product warehousing and storage, refrigerated warehousing and storage, and general warehousing and storage)	21	Tobacco products		
		22	Textile mill products		
43	U.S. Postal Service	23	Apparel and similar finished products made from fabrics and similar materials		
44	Water Transportation	2434	Wood kitchen cabinets		
		25	Furniture and fixtures		
		265	Paperboard containers and boxes
